EDUCATION

Purdue University, Polytechnic Institute, College of Science

Bachelor of Science in Computer Science, Concentration in Graphics and Visualization

Bachelor of Science in Game Development and Design

GPA: 3.32

West Lafayette, IN

May 2028

EXPERIENCE

Frontend Development Intern

King of the Curve

Remote

September 2025 - Present

- Build responsive mobile and web UI components using Flutter and Dart, delivering features aligned with product and design requirements, including “gamified” study tools for medical students
- Convert Figma prototypes into accessible, reusable UI components that maintain visual and interaction consistency across the platform
- Contribute to a company-wide UI rebranding initiative, updating component libraries and implementing refreshed design patterns
- Improve usability and user workflows for a platform with 400,000+ total users and 16,000+ monthly active users, helping strengthen engagement and retention

Developer

Hack The Future

West Lafayette, IN

October 2025 - Present

- Develop a full-stack web app with separate manager and user dashboards for scheduling, task tracking, and check-in/check-out functionality
- Implement user workflows for personal task and item tracking through an accessible web interface using React and MongoDB
- Collaborate in cross-functional teams of 10+ (developers, designers, team leads) using agile workflow to deliver production-ready solutions

Treasurer

Sigma Pi

West Lafayette, IN

August 2025 - Present

- Maintain and organize a total budget of \$40,000 across the Fall and Spring academic semesters
- Lead the 66 active on-campus members by enforcing all established payment deadlines promptly and efficiently
- Communicate regularly with Purdue IFC leadership and National Sigma Pi officials in relation to chapter operations and compliance with school rules

PROJECTS

Kiln Game Jam | Godot, GDScript, Photoshop

- Won 1st place in a 48 hour game jam; built gameplay systems with procedural modifiers and dynamic dialogue
- Designed art assets and implemented randomized challenges to improve replayability

Social Media Application | Java

- Developed a social media app with user accounts, posts, and interaction features
- Applied object oriented design to structure backend logic and modular architecture

Discord Bot | Python, discord.py, SQLite

- Built an asynchronous Discord bot with persistent user stats, leaderboards, and data tracking over time
- Implemented scheduled reminders and event driven commands using background task loops

EXTRACURRICULAR ACTIVITIES

Purdue University Dance Marathon, Color Captain

March 2025 - Present

IEEE Computer Society, Member

January 2025 - Present

SIGGD (Special Interest Group on Game Development), Member

January 2025 - Present

SKILLS

Languages / Frameworks: Dart, Flutter, React, Java, MongoDB, Python, C++, C, GDScript, JavaScript, Git

Software: Visual Studio, Adobe Photoshop, DaVinci Resolve, Godot, Unity, Unreal Engine, Linux, Figma
